

Lethbridge Community College and Red Crow Community College

School Based Water and Sanitation

South Africa

The purpose of this project is to provide the department of Education in Province of the Eastern Cape with the capacity to provide training, tools, and equipment for local building cooperatives (Community Water and Sanitation Worker). The cooperatives will provide on-site water and sanitation projects in the rural and urban outskirts settlements of the former Ciskei and Transkei homelands.

David Manz (me the photographer in this organizational workshop in Fernie British Columbia this snowy November) will be providing instruction on the manufacture, installation, operation and maintenance of the BioSand Water Filter 2007 to 2009.
